

THE EMPRESS EXPRESS

VOLUME XIX, No. 1

EMPRESS, ALTA. THURSDAY, June 4th, 1931

Price: \$2.00 Per Year.

United Church

Public Worship, 11:30 a.m.
Church School, 10:30 a.m.
Subject, "Why we live in the church."
Services will be conducted at:
Leland, 3 p.m.
Social Plains, 7:30 p.m.
"The average young man expects the woman he marries to attend church somewhere. The reverse should also be true."
You are invited to worship with us.
Rev. Geo. A. Shields, Minister.

The World Problem

That the whole world is suffering from financial oppression is quite evident. Some of the causes given are the following:
1. War debt payments and their exceedingly serious effect on the European buying power. As these countries must pay their debts to U.S.A. in gold, Europe cannot buy North American goods.
2. The effect of the American and European Tariffs in throwing world trade out of balance. The natural flow of international trade has been seriously obstructed.
3. The revived competition of Russia in placing large quantities of commodities on the market, e.g., wheat, oil, lumber, pulpwood, etc.
4. The real distribution of gold and the consequent shortage of this metal for monetary purposes. U.S.A. and France have been hoarding immense quantities of gold in their vaults.

Hospital Notes

Born to Mr. and Mrs. Arthur Meding, June 1, a daughter, Miss Paulina Hausner, of Burstall, has been admitted to the hospital.
Mrs. C. Gred of Mendham, who underwent a serious operation is doing nicely.
Born to Mr. and Mrs. A. T. Crawford, on Wednesday, June 3, a son.
Born to Mr. and Mrs. J. N. Anderson, June 3, a son, Mother and baby are doing well.

5 The wheat situation has resulted in giving Canada a particularly hard blow. It would seem that the agricultural crisis underlies the industrial crisis and that the wheat crisis was fundamental. The agricultural regions are unable to import goods on account of their purchasing power being almost nil and this results in unemployment in industrial spheres. At the beginning of this year U.S.A. had 150 million bushels of wheat on hand. Canada had exportable wheat to the extent of 250 million bushels. Argentina had 54 million tons and Australia 44 million tons of wheat surplus. This means that there was 174 million tons of wheat looking for a market.
Now all Europe, excluding (cont. on back page)

Castle Coombe

United Church services will be held at:
Watfield at 11 a.m.
Mayfield at 3 p.m.
Sunday School at 4 p.m.
D. B. Tupper, Student-in-charge.

Empire Day Program And Prize Winners

The following is the program of the Empire Day Celebration held under the auspices of the local chapter of the I.O.D.E. at the Kitchener School on May 22, 1931:
Song, "O Canada"—Soprano, "Embodiment of Liberty, Truth and Justice, flag of my Country to thee I bow."
Recitation, Rawly McGuire, Chorus, Grades 1-5—"When Robins are singing in May."
Recitation, Frank Highmore, Address: Phyllis Tarr, Cornet solo, Jack McGuire, Recitation, Mildred Hearn, Chorus: School, "The Maple Leaf."

Recitation: Ruth Arthur, Presentation of Prizes and Flags by Mrs. MacPherson, Regent of the I.O.D.E.
"God Save the King."
Essays on History were written by several pupils. These being judged by Miss Kelley, Rev. Shields and Dr. Dowler.

The Prize winner was Kenneth Boswell, Grade X student. The Regent explained that on account of the Society's funds being low, it was decided to give a framed picture, "Canada's Answer," to the room of the prize winning pupil—the name of the winner to be printed on the picture. This student also received a book for the best essay in the contest.

Others who competed meritoriously were:
Special mention:
1 Grade IV, Muriel Demarest.
2 Grade III, Connie McGuire, Honorable mention:
1 Grade XI, Henrietta Turner.

2 Grade IX, (a) Katie O'Neil, (b) Marion MacPherson.
3 Grade IV (a) Jean Moore (b) Lillian Westberg.
4 Grade VI, (a) Maxie Pawlak, (b) Corinne MacPherson.
5 Grade VII, Rawly McGuire.
Miss Kelley who read the prize essay explained that the three adjudged to be the best were so close in order of merit that it was difficult to decide the prize winning essay.

Phillip Burke received the book, "A Nursery Geography" for highest standing in Arithmetic in Grade II.

Those who received Flags for General Proficiency are as follows:

Grade I, Rosemarie Pawlak.
Grade II, Cameron McGuire.
Grade III, Connie McGuire.
Grade IV, Lillian Westberg.
Grade V, Robert Miller.
Grade VI, Maxie Pawlak.
Grade VII, Viola Burke.
Grade VIII, Bill Lacey.
Grade IX, Madge Frost and Vera Morrison.
Grade X, Kenneth Boswell.
Grade XI, Violet Morrison.

At the close, ice cream cones were served to the scholars and all those present.

\$750,000 Measure For Vocational Aid

Ottawa, May 27—A bill granting \$750,000 annually for 15 years to the provinces in proportion to their population in aid of vocational training has passed first reading in the House of Commons.

High Guthrie, Minister of Justice, in introducing the subject, explained that the \$10,000,000 grant passed in 1919 and covering a ten-year period had been for "technical education" whereas the present grant was intended to cover a wider scope, including agricultural training and, unlike the former, there would be no limitation as to the proportion that might be expended on school buildings and equipment.

While W. L. Mackenzie King, Liberal leader, was completely in sympathy with the object of the measure he thought that it was high time for examination into the soundness of the policy of federal grants to provinces.

Confederation was the result of a compromise, he said, whereby the provinces should raise revenues directly, and in addition the Dominion should make contributions by way of subsidies on a per capita basis. If the method were continued he did not think there would be any conflict of jurisdiction in revenue matters, but if the Dominion were to make grants for all kinds of purposes and conditions a serious situation would develop.

He objected to increasing grants to the provinces at a time when the strictest economy was necessary if the government ever intended to balance its budget.

J. S. Woodsworth, labor leader, disagreed with Mr. King, asserting that if Canada was to progress at the same rate as

The Budget

According to the daily press comment opinions are divergent on the effects of the Budget. Some of the special points are:
Sales tax increased 1 to 4 p.c.
Numerous changes in income tax; \$8000 exemption raised to \$3500.
No general revision of tariff; 200 rate-bearing items amended.
One cent war tax which has always applied on drop letters now to be imposed on all letters to meet Post Office deficit of close on \$8,000,000.

Magazines and periodicals made subject to specific duty of 15c. a lb.
Postal rate periodicals and newspapers increased 15c. a lb. charged on newspapers with circulation in excess of 50,000. Religious, scientific, educational, agricultural publications exempt.

Dominion government to absorb the burden on freight, transporting cost of wheat produced in Western Canada.
Coal industry of Maritime and West provinces to have \$1,800,000 in subsidies provided by Dom. Govt.

Federal contributions to old age pensions increased 50 to 75 p.c.
Budget 1930-31, \$75,244,973. Not debtd, March 31, \$2,261,068,316. Net liabilities, March 31, \$2,610,788,917.
Expenditures for fiscal year, \$440,000,000. Revenue, \$356,213,000. Cash in bank at credit of receiver-general, \$14,000,000.

Other nations it should spend more than \$750,000 on technical education. As a means of swelling the Federal treasury he advocated increasing the income tax and the imposition of a federal inheritance tax.

Mr. Guthrie closed the debate but the bill would not direct the provinces of any province, but rather "recommend" that "although late in coming" it was the outcome of a policy that Sir Wilfrid Laurier instituted years ago, and Mr. King his successor had continued.

Impounded

Burple Grey Mare, aged 8 or 10 years old, weight about 1100 lbs., branded up on front right shoulder.
Was impounded May 13, on the N.E. 34-36-28, W3, No. 282 R.M. of Manitoba.
HENRY KLIPPERT, Estuary, Sask. Poundkeeper.

Anglican Church 1st Sunday after Trinity.

Golf Is Golf From Coast To Coast

Golf has assumed such important proportions in the make-up of modern everyday life that it cannot be considered a very real phase of the activities of those who serve the public. The Canadian Pacific Railway is such a one and its train services to golf courses are established arrangements for guests at its many hotels to enjoy the game are the practical interpretation of its desire to maintain the traditions of its desire to maintain the requirements of the Canadian people and their visitors. From coast to coast, excellent courses are available and where the company does not operate its own clubs, playing privileges at first-class clubs are granted. In the Maritime, there are courses at St. Andrews-by-the-Sea, N.S., Kentville, N.S., Digby, N.S. and Yarmouth, N.S. and in connection with the company's hotels. Quebec City has two fine courses, club dating back to 1874. Montreal has the oldest club in Canada, the Royal Montreal, founded in 1871, which today boasts two championship 18-hole courses. Other Clubs are numerous and good. Toronto, too, has many excellent links, including the Royal York Golf Club, where guests at the Royal York Hotel have playing privileges. Ontario, among the best in the country (Lake of the Woods) have a very 9-hole courses for golfers. Throughout the Prairie Provinces, golf is available at all the larger centres, while the Banff Springs Hotel Golf course is among the best in the country in settings of unrivalled mountain scenery. It is the Mecca for golfers from all over Canada and the United States, to say nothing of the numerous overseas visitors who play it every summer. Vancouver and Victoria offer ready hospitality, the latter standing, unique among Canadian golf centres, in that the game is played throughout the 12 months of the year, the annual mid-winter tournament being an outstanding feature of the golf calendar.

Pathfinding Tour To Perfect Arrangements For Air Pageant In July

Ottawa, Ont.—A "pathfinding tour" which has for its purpose a flight to the larger centres in Ontario and the prairie provinces in order that the arrangements might be perfected for the series of air pageants which will open at Hamilton, Ont., on July 1, was begun on Saturday, May 16.

Mr. Ross will touch at Hamilton, Windsor, Ont., and crossing into the United States will proceed by way of Chicago, Minneapolis and Grand Forks, N.D., to Winnipeg.

At the Manitowish peak he will meet with the executive of the association some time this week, when the final touches will be put on the preparations for the pageant. The flyer will then continue to Regina, Moose Jaw, Saskatoon, North Battleford, Edmonton and Calgary, western terminus of the present pathfinding tour. Mr. Ross will take up with officers of the local flying clubs arrangements for the "show".

The pageant will be a travelling one, and will be staged at numerous places all over Canada during July and August. For the purpose of the tour, Mr. Ross is accompanied by the air-mindedness of the Canadian people, the Department of National Defence, is contributing a flight of Sea King fighters.

The plane carrying Mr. Ross is a Cessna 400, a biplane, owned by Major-General J. H. MacBrien, president of the league. On his return from the West, Mr. Ross will make another trip to the Maritime Provinces for a similar purpose.

U.S. Immigration Policy

President Says Results Of Regulations Has Reduced Unemployment

Washington, D.C. — President Hoover announced the result of a study of the effect of the United States to any immigrants who might be public charges, the flow of population had turned out to be a net gain. The president estimated the immigration policy inaugurated some months ago had reduced the number of unemployed by 175,000.

The president announced that during the past three months departures from the United States exceeded arrivals by 3,551 for a month while during the corresponding period last year, arrivals exceeded departures by 12,605.

Production Not Excessive

Livestock Report Shows Beef Growing Is on Low Basis

Ottawa—Beef is practically the only human food at the present time that is not in excess of demand. The eleventh annual Livestock Market and Meat Trade Review shortly to be published by the Dominion livestock branch.

The review observes Canada's meat production at present is on a comparatively low basis, but that this does not necessarily guarantee a maintenance of good prices during the present year.

Every Effort Being Made To Promote The Sale Of Canadian Wheat

Ottawa—Every possible effort is being made by the government to find markets for Canadian wheat and to disabuse any antagonistic attitude abroad of Europe might have against grain from this country. Hon. J. Stevens, minister of trade and commerce, declared in the House of Commons.

When estimates for his department were before the House, Mr. Stevens was pressed by opposition members to rectify the steps taken by the government to find markets for wheat. In response to that invitation, Mr. Stevens said the government, upon assuming office last November, had no time in instructing Canada's trade commissioners to bend every effort in broadening markets for wheat and flour.

In 1929 and 1930, Mr. Stevens proposed, an attitude arose in Russia that was against wheat from North America. Highly or wrongly, Canada was charged with advancing prices. Europe then turned to other markets. Argentina received additional business, he explained, "as a result of the war."

Riots In Spain

Government Orders Cancellation Of Private Property Of Alfonso

Madrid, Spain.—Following further anti-clerical riots in Spain, in spite of the strict watch of soldiers, the government has decreed the cancellation of the private property of King Alfonso, pending an investigation and commanded provincial governors to use the strictest measures to restore order.

Meanwhile Cardinal Primate Segura, a Catholic archbishop of Toledo, whose pastoral letter created a stir over a week ago, had crossed the Spanish border and was on his way through France, presumably on a journey to Rome.

Several more churches and Catholic religious houses were burned and sacked in provincial cities, in spite of the fact that martial law had been declared in most of the larger centres.

A. A. nation-wide check-up of police forces, civil guards and provincial governors were ordered by the cabinet. The action resulted from the government's belief that some of these officials have not been acting honestly in dealing with the situation.

Twenty-nine of the police or their lieutenants, several officers of the civil guards and one secretary of a provincial government were discharged for alleged incompetency.

It was reported also that some provincial governors were to be dismissed for alleged incompetency. Cardinal Segura, accompanied by his brother, Canon of the Toledo Cathedral, was expected to arrive in the French border at Hendaye, France, and continued from there to Toulouse. It was supposed they were bound for Rome.

Rival Aces Meet

Wing Commander Bishop Shakes Hands With German Flyer

Montreal.—Canada's foremost war ace, credited with more aerial victories than all other allied pilots, met Major Hugo Koeling, ex-commanding officer of Baron Von Richthofen's Flying Circus recently. Wing Commander William A. Bishop, V.C., shook hands with the German flyer, and then the two sat down and conferred upon scenes over the Arns sector of the front away back in 1917. Major Koeling said that Bishop was as highly respected as Richthofen by the Germans at home.

Celebrates 83rd Birthday

Ottawa, Ont.—Hon. C. H. Mackintosh, who in 1933 was Lieutenant Governor of the North West Territories, celebrated his 83rd birthday at the front away back in 1917. Major Koeling said that Bishop was as highly respected as Richthofen by the Germans at home.

Has Letter For Japanese

Tokyo, Japan.—Sgt. Yoshihara, Japanese aviator, who is attempting a solo flight from Japan to the United States, has received a letter from the United States, which is carrying with it a solo effort across the North Pacific a sealed letter from Hon. Herbert Martin, Canadian minister of trade, to the prime minister of Canada, Mr. H. B. Bennett.

Later on, Mr. Stevens said, a grain trade in Western Canada had changed its policy. That had been followed by a better feeling toward Canadian wheat in Great Britain and Europe, but that situation would soon be entirely rectified.

In many flour millers in Germany, France, Switzerland and some other countries changed their attitude, as to all Argentine wheat, not Canada's, that the millers were found to be reluctant to change back their machinery and many governments had applied "very drastic restrictions" for their own agriculturists and wheat growers. Other nations adopted a "free quota" against foreign wheat and strenuous propaganda was carried on to use rye or black bread.

"Regulating these conditions and to disabuse the minds of European millers," continued Mr. Stevens, "we have tried to build up markets in other parts of the world. But that will take time, it will take years. We have made some progress. We also found new markets in Colombia, small, I admit."

Later on, Mr. Stevens said, a grain trade in Western Canada had changed its policy. That had been followed by a better feeling toward Canadian wheat in Great Britain and Europe, but that situation would soon be entirely rectified.

For Armament Reduction

Canadian Womanhood and Organized Labor Support League

Ottawa, Ont.—Canadian womanhood and organized labor strongly support the League of Nations and its aims. It was reported at the ninth annual meeting here of the League of Nations Society in Canada. It was made known that a huge petition will be presented on behalf of the women of the Dominion at next year's meeting of the Naval Disarmament Conference, urging reduction of the manufacture of instruments for warfare.

Tom Moore, president of the Dominion Trades and Labor Congress and its representative of the society's executive, declared before the gathering far more was being spent in all countries on armaments than on social effort.

"It is necessary that we find some means by which money may be devoted to the betterment of the people instead of upon means of destruction," he added.

A number of other speakers reported the organizations which they represented supported the work of the League of Nations. Among these were Mrs. C. Field Robertson of the Federated Women's Institute embracing 80,000 Canadian women, and the National Council of Women, and Miss Agnes MacPhail, M.P., who reported for the United Farmers of Ontario.

Competition For Card Designs Is Announced

Subject To Be Summer Outdoor Scene In Canada

Montreal.—Christmas card designs will be received by the Imperial Order Daughters of the Empire in the annual competition which closes Nov. 1, 1931. It is announced. The subject to be a Canadian outdoor summer scene. The prizes are offered, of \$100, \$50 and \$25.

The contest is open to all British subjects residing in Canada, professional or amateur artists. A person who has previously won a prize may not be awarded the same prize. A competitor may submit more than one design but each entry should be sent separately.

Fire Causes Heavy Loss

Destroyed Main Barn On Hay's Dairy Farm Near Calgary

Calgary, Alta.—Loss of \$40,000 partially covered by insurance was suffered by Hay's dairy farm, near here, in a fire that destroyed the main barn, hundreds of bales of hay and several tons of hay.

One hundred head of prize cattle had been taken from the barn for export just 15 minutes before the fire started. Seven head of cattle in the barn were lost to suffocated by employees.

Carry On Thirsting Trade

Ottawa, Ont.—When the Islands of St. Pierre and Miquelon were ceded to France after the conquest of Canada by the British, it was little dreamed the time would come when they would rank ninth among the nations of the world in total trade with the Dominion. Consisting almost entirely of liquor, Canada in the last year sold the two islands a total of \$1,079, out-ranking Australia, Ireland, Argentina, Brazil, China, Mexico, Sweden and Denmark.

NOVEL DISPLAY ON WESTERN TOUR

In this specially cuttited Canadian National Railways express car now touring Western Canada, the Canadian General Steel Ware are giving actual demonstrations of coal, wood, electric, oil and gas and gasoline heaters. While the car will, whenever possible, travel on passenger runs, bunks have been installed for the use of attendants when the car is being hauled by freight.

TO SEEK BURIED TREASURE

Cannot Collect Income Tax On Indemnities

Supreme Court of Canada Holds Down Important Ruling

Ottawa.—Insurance indemnities are not liable to Dominion income tax. The Supreme Court of Canada held in allowing the appeal in the case of The British Columbia Fire and Casualty Company against the King. The company insured itself against fire, also against loss of profits from fire, also against loss of profits from fire, also against loss of profits from fire.

The company insured itself against fire, also against loss of profits from fire, also against loss of profits from fire, also against loss of profits from fire. Made In West Campaign

Develop Markets For Goods Manufactured In Western Canada

Winnipeg, Man.—Western Canadian manufacturers gathered in conference here and decided to commence a campaign to sell "Made-in-the-West" goods to the prairie folk. A plan was formulated to develop markets for articles manufactured in the Canadian West.

A distinctive identification mark or label placed on all goods was favored by the conferees. The mark would show that the articles were produced by prairie labor. Manufacturers and retailers will cooperate closely in furthering the "Made-in-the-West" campaign.

Education In Penitentiaries

Ottawa, Ont.—Greater opportunity for educational expansion should be given inmates of Canada's penitentiaries, believes Miss Agnes MacPhail, one woman member of the House of Commons, who addressed an Ottawa service club. The increase in penitentiary inmates was attributed by Miss MacPhail to the prevalent depression and unfavorable home conditions.

All Weather Road

Prince Albert.—Completion of an all-weather road between Prince Albert and Regina was forecast by Hon. A. C. Stewart, Minister of Highways, in an address before the business men of the city last night. The highway, which would be completed when economic conditions permitted, he said, would connect Regina with Prince Albert National Park by way of Highway No. 2.

New Tariff Board Will Have Wider Scope Than Former Body

Place Idle On Land

Plan Proposed To Establish Jobs On Manitoba Farms

Winnipeg, Man.—A scheme to establish jobs on farms has been placed before the Manitoba Government and the city fathers of Winnipeg. J. G. Alexander and J. P. Stearns, of Winnipeg, are authors of the scheme. They urge that huge sums spent on unemployment relief be used to establish families on the land.

Land suitable for farming operations is available at \$100 to \$150 per acre, the men claim. Their plan would give permanent instead of temporary relief and enable the jobless to produce their own food and in time become taxpayers, the two men state. It is stated that more than 1,100 families have announced their desire to become farmers if the money spent on relief can be used to aid them.

The proposed plan would permit families to occupy farms owned by the government and they can retain the amount of money advanced, then they will receive title to the land.

Interview By Television

Mrs. Philip Snowden Gives Interview Through New Medium

London, England.—While Rt. Hon. Philip Snowden, Chancellor of the Exchequer, was confined to bed for a few days under doctor's orders, the Daily Herald quoted Mrs. Snowden in what it described as "the first interview by television in history."

Both the interviewer and Mrs. Snowden were visible as well as audible to each other, one in the Herald's office and the other at 11 Downing Street. Asked about the chancellor's health, Mrs. Snowden told the reporter: "He has had rather a setback this week. I'm afraid. But I do not think it is serious. However, it has temporarily deprived him of the use of his legs to some extent."

Mr. Snowden actually rose from a sick bed a short time ago to place the budget before the House of Commons. His physicians today told him to rest to bed.

Makes Two New Records

Empress of Canada Clips Hours On Trans-Pacific Trip

Victoria, B.C.—Giving her faster sister ship, the Empress of Japan, something to aim at next month, the Empress of Pacific liner Empress of Canada arrived here from the Orient making two new records on the trans-Pacific voyage. She called at Honolulu on the way across from Seattle and set a new record for the lap from Honolulu to Victoria. The last stretch was done in four days, twelve hours and twenty-nine minutes. It is at least thirty minutes faster than this trip has ever been done before. The run from Yokohama to Honolulu was done in four days, eleven hours and thirty minutes.

Conference On India

Second Round Table Conference To Be Held In November

Simla, India.—The first week of November was tentatively set for the second round table conference at London on an Indian constitutional status. The federal structures committee which will undertake preliminary work, will meet in London in September.

The conference should be concluded by Christmas, exploring in less than two months problems of self-government and necessary safeguards for the great continental peninsula with its 350,000,000 souls.

There will be 100 or more delegates, including Mahatma Gandhi, whose vast constituency—the Indian Nationalists—were not represented in the round table conference recently concluded at London.

Ramsay MacDonald Makes Statement Of Britain's Airship Policy

London.—Making his long-awaited statement on the future airship policy of Great Britain, Prime Minister Ramsay MacDonald indicated in the House of Commons that Britain's airship activities would be confined largely to scientific research. The R-100 will be retained without alterations as a ship for experimental purposes, and the base at Cardington will be kept up on a research basis.

Mooring masts established at St. Hubert airport, near Montreal; at Ismailia, Egypt; and Karachi, India, will be the subject of the assets so far as the St. Hubert mast was concerned, of the Canadian government. He said that the prime minister was not replying as yet to inquiries as to his view of the St. Hubert mast.

"The idea was that with the coop-

Second Round Table Conference To Be Held In November

Simla, India.—The first week of November was tentatively set for the second round table conference at London on an Indian constitutional status. The federal structures committee which will undertake preliminary work, will meet in London in September.

The conference should be concluded by Christmas, exploring in less than two months problems of self-government and necessary safeguards for the great continental peninsula with its 350,000,000 souls.

There will be 100 or more delegates, including Mahatma Gandhi, whose vast constituency—the Indian Nationalists—were not represented in the round table conference recently concluded at London.

Ramsay MacDonald Makes Statement Of Britain's Airship Policy

London.—Making his long-awaited statement on the future airship policy of Great Britain, Prime Minister Ramsay MacDonald indicated in the House of Commons that Britain's airship activities would be confined largely to scientific research. The R-100 will be retained without alterations as a ship for experimental purposes, and the base at Cardington will be kept up on a research basis.

Mooring masts established at St. Hubert airport, near Montreal; at Ismailia, Egypt; and Karachi, India, will be the subject of the assets so far as the St. Hubert mast was concerned, of the Canadian government. He said that the prime minister was not replying as yet to inquiries as to his view of the St. Hubert mast.

"The idea was that with the coop-

New Uses For Wheat And Other Grains Is Subject Of Research Council Survey

New uses for surplus of wheat and other grains are being made the subject of an exhaustive survey by the National Research Council, it was announced in a statement issued recently. Other studies are being conducted in the hope of developing products which will turn waste materials into products of commercial value.

Dealing with the program of the National Research Council, the statement set forth:

"Two researches initiated are already yielding interesting results. One of these is a study of the refuse screenings (largely weed seeds), which accumulate at the elevators at the head of the lakes to the extent of more than 50,000 tons a year.

"Today these screenings, if marketable at all, fetch almost nothing. The research is already indicating that they could be made to yield products—oil for soap making, fertilizer and possibly feed—which would make them distinctly valuable.

"In the other research a beginning has been made on the problem of utilizing methods of utilizing straw. This big problem is not likely to be solved in a hurry, but is surely one which a Canadian research institution should tackle. The traveller through Western Canada after harvest cannot fail to have been impressed by the almost mountainous piles of straw which dot the landscape, but few probably realize that the total amount of straw grown in Canada each year aggregates about 50,000,000 tons.

"The National Research Council is making a careful study of the possibilities of using surplus grain for the manufacture of fur, alcohol, starch, dextrin, glucose and other sugars, acids and liquor solvents by means of fermentation, oils, etc. This includes a study not only of the technical but also of the economic aspects. The latter are clearly important, as the fact that a given method of utilizing grain for the above purposes is economical only in seasons when prices are abnormally low, obviously an important consideration. In determining the feasibility of establishing plants based on such a method."

A Canadian Egg Plant

Experimental Work Being Carried On To Get Type Fixed

An egg plant which promises much of value to Canadians is referred to in the annual report of the director of Dominion experimental farms. As the result of long continued studies, the Dominion horticulturist makes the following observations:

A Japanese egg plant called Nagasaki, with fruit too small for the general market, having proved the only egg plant that would produce a satisfactory crop in many parts of Canada owing to its earliness, was crossed with the Black Beauty, one of the large but rather late varieties, with the result that an egg plant of good size was produced, which is much earlier than the Black Beauty. Experimental work in this connection is now being centred upon getting the type fixed. When this is accomplished, an egg plant suitable for cultivation under Canadian conditions will be established and it will probably become an important new factor in horticulture throughout Canada.

Light Bulb With Little Heat

One of the problems long attempted by science, that of producing light without heat, has been brought nearer to solution by a Paris scientist who has succeeded in making an incandescent lamp in which eighty per cent of the energy supplied by the electric current is converted into light. Many of the best lamps used today yield not more than six per cent, in light, the remainder appearing as heat and other radiations.

Silk in Japanese warehouses at one time recently was valued at \$500,000,000.

"Look here, stand me a whiskey and soda, and you may win." Duff-Barber, Berlin.

W. N. U. 1930

Better Demand For Wheat

European Market Much Stronger During Past Few Weeks

Europe is buying Canadian wheat again, indicates the monthly report on grain movement issued by E. A. Ursell, statistician to the Dominion Board of Grain Commissioners. Also, he forecasts, Europe will continue to buy Canadian wheat.

In April, exports of wheat from the Dominion totalled 15,669,813 bushels—more than 3,000,000 bushels in excess of exports for March. Of the April total, 15,095,843 bushels were cleared from seaboard ports. The rest was sold in the United States for milling in bond. Mr. Ursell mentions that chartering of tramp tonnage and available liner space is brisk at Montreal, an indication that wheat movement from Montreal will be substantial.

Vancouver and Prince Rupert, Pacific ports, were leading export points in April, a total of 5,872,653 bushels being shipped from the two. Shipments from Canada ports on the Atlantic amounted to 3,638,888 bushels from United States vessels. Imports of Canadian wheat for milling in bond totalled 1,565,000 bushels.

Wheat From Russia

Russian Purchases More Wheat From Russia Than From Canada

Canada came second best to Soviet Russia in supplying wheat to the United States in the first three months of 1931; it was announced by the Department of Trade and Commerce. In the corresponding period of 1930 and 1929 the Argentine Republic led with Canada a close second. This year, the Argentine Republic held the first place, followed by the United States, the United Kingdom in the first quarter of the year, Harrison Watson, Canadian Trade Commissioner in London, England, reports that of total imports of wheat amounting to 41,000,000 bushels, the Soviet Russia supplied 10,800,000; Canada, 10,400,000; Australia, 8,000,000; and the Argentine Republic, 7,257,000. Canada maintains her lead as the chief source of imports into the United Kingdom of wheat supplying 702,345 cwt. in the first quarter of 1931, as compared with 492,211 cwt. from the United States, her nearest competitor.

Where Plumb Line Is Crooked

In Northern India It Always Inclines Toward the South

India is a land of wonders. It has the tallest mountain in the world, the biggest volcanoes, the rainiest spot, and so many snakes that 20,000 people and 4,000 cattle are killed by them every year. But there is a still greater wonder. You know that if a boy holds up a plumb line in England that it, a string with a weight on it—hangs straight down; but in Northern India if a boy holds up a plumb-line it does not hang straight, it leans toward the south. Why is this? One would think that if it leaned at all it would slant toward the mighty Himalaya mountains, attracted by their great mass. But, as a matter of fact, these mountains are made of light rocks, while the great Deccan Plateau to the south consists of very dense and heavy soil. The plain therefore, attracts the plumb-line a little out of the straight.

Establish Packing Plant

Eastern Syndicate To Commence Operations In Saskatchewan

A Prince Edward Island syndicate has purchased a three-quarter section farm close to Long Lake, Saskatchewan, for the purpose of producing, raising and slaughtering hogs, and curing and shipping bacon to England. It is stated that buildings capable of holding 5,000 hogs are being erected and the necessary machinery and equipment secured. The syndicate stock of pure-bred Yorkshire hogs has been purchased and shipped to Long Lake.

High Finance

Twelve out of 17 police captains so far investigated in Chicago had excessive bank accounts. One of them, on a salary of \$4,000 a year, bought \$48,000 worth of securities in four years. At least it is to be said of him that he did not waste his substance in riotous living.

Honore, Flaubert, and other writers of ancient Rome, complained of the noise of the city, long before automobile horns, street cars, and radios, says a writer of the Classical Weekly.

QUEEN MARY ATTENDS WEDDING

Queen Mary leaving St. Margaret's, Westminster, with the bride's father, after recent wedding of her godchild, daughter of Sir Derek Koppel, Master of the Household, to Philip Brodmann, M.C. Her majesty motored from Windsor especially for the occasion.

No Cause For Alarm

World Will End In Million Millions Years, Says Astronomer

Accurate data on the precise moment when the Archangel Gabriel will send a blast from the trumpet of doom to destroy man and all his handwork was obtained when Sir James Jeans, noted British astronomer, arrived at New York on the liner "Mauretania."

Sir James took two deep breaths and announced that, barring unforeseen accidents the end of the world would arrive in a million million years. Whereupon, New Yorkers went right ahead with their plans for the week-end.

Substitute For Flax

New Grain Is Being Tested Out In

Safflower, which looks like a thistle without prickles, and has been cultivated in India and Egypt as an oil seed crop, is being tested in Western Canada, as a partial substitute for flax. The seeds contain a drying oil valuable in the production of paints and varnishes, and the oil cake is useful as stock feed. Safflower is suggested by experts in agriculture as a possible supplementary crop to oat in the Prairie Provinces.

Nothing pleases a lauffer more than to annoy a busy man.

Farm To City Movement Is Becoming Less Popular And Reaction Is Setting In

Manitoba Hay For Scotland

Inquiry Is Made Regarding Shipments Via H.B. Route

A shipment of Western Canadian hay to the Old Country market via the Hudson Bay Railway and Churchill, was a new possibility presented to the Board of Trade of The Pas, in a letter from the official Canadian Government Trade Commissioner in Glasgow, Scotland.

Asking for information as to the available supply of timothy in the western part of Canada and setting forth some of the market facts in Scotland, D. A. Ross, secretary of The Pas Board of Trade, received the letter from G. H. Johnson, in Glasgow, Scotland.

The letter in part follows: "Your name has been given to me by the Minister of Mines and Technical Resources, Manitoba, with reference to the following: A firm in Glasgow, Scotland, who import the largest quantities of Canadian hay in Scotland, and have for many years, desired to have information on the prospects of hay shipments from the prairie provinces via Churchill. As this route will eventually be open for transportation in a few months time, there should be an opportunity for timothy hay for this market from Manitoba, if this quality is grown there."

The letter gives the details of the market and urges the local Board of Trade to investigate the possibilities of the market. The board will make a searching inquiry into the matter within the next few weeks.

Alberta Beef For Britain

May Ship From 400 to 500 Head Of Prime Beef Each Week

Larger supplies of one of Britain's principal meats on the menu for the people of that country—beef—may be sent from Canada, if satisfactory arrangements can be made between the British Consumers' Co-Operative and Alberta breeders. Representatives of this co-operative society, which caters to upwards of twenty million consumers in the British Isles, after an extensive tour of Alberta ranches, stock farms and feed lots, have it is reported, stated their intention of taking from 400 to 500 head of prime beef cattle per week, provided a standard of quality can be guaranteed. They have been in consultation with members of the Alberta Government and representative of the Alberta stockmen's associations and co-operatives.

Particular interest was evinced by the British buyers in the "feed lots" in the vicinity of Raymond, Alberta, where baby beef are being fed on beet tops and other waste products of the refinery there in combination with alfalfa and other foods. The representatives of the British Consumers' Co-Operative, which has its headquarters at Manchester, England, are George Riddle, W. Eastwood and George W. Brooks, accompanied by A. C. Wieland, representative in Montreal of the co-operative.

What Has Limited Vitality

Will Live For Good Many Years But Not Thousands

Wheat from Tutankhamen's tomb or from that of any other mummy's home in Egypt will not sprout on any farm in the world, and if anyone thinks otherwise, Sir Wallis Budge, the world's most eminent Egyptologist, is ready to undeceive him. Sir Wallis, for the past quarter of a century, has been told the story so often that he had a little form printed which he explained just why nothing of the kind could happen. He writes to the "Times" telling the reason once more. What is dug up in Egyptian mummies' tombs is an excited glow in front of a tourist is what all right, he says, but it is not the same as the wheat that is carried by modern Egyptians who regard the tombs as excellent storage places. Genuine ancient wheat, recovered from tombs that have been opened for the first time, has been made the subject of experiments at Kew Gardens in England, by experts under scientific conditions, and, in no instance, has such wheat ever sprouted. Finally not one of the excavators at Tutankhamen's tomb discovered any wheat in it. What it seems has only a limited vitality. It will live for a good many years, but not for thousands.

New Landing Field Invented

A garage and landing field for aircraft on top of tall office buildings has been invented. Incoming pilots would direct their planes into a wire tunnel only twice as wide and twice as high as the machine itself. On the floor of the tunnel fans set in motion by a signalman would force air out at the exact speed of the landing plane. When the plane touched the floor, the fans would stop and the fans would be cut off at the same instant.

Pocket Radio Sets

Pocket radio sets weighing less than two pounds and having an effective range of 100 miles are to be carried by London policemen on their rounds to keep in touch with headquarters.

Beaver Sanctuary For Manitoba

**Apache Indian To Have Charge Of
Beaver In Riding Mountain
National Park**

Grey Owl, Apache Indian, of Cabano, Quebec, perhaps the only human being who has ever won the confidence and friendship of the Canadian beaver, is now resident at the Riding Mountain National Park, where he will have charge of a beaver sanctuary—the first of its kind to be created on this continent.

Grey Owl's career reads like a wild and west thriller. As a lad he bivouacked with Buffalo Bill. He was born in the western states, grew up to the life of a trapper and hunter. Like other Indians, he had a deep affection for the beaver, believing it to be a human being, respecting its wisdom and industry. In his youth beaver pelts were the prize of the trappers, but while Grey Owl excelled as a trapper, the killing of beavers grew increasingly distasteful to him. Finally he took a vow never again to kill a beaver. He moved to the wilds

of Quebec, near an Indian village called Cabano, and began to tame wild beavers. It had never been done successfully before, but Grey Owl, through his intimate knowledge of these animals, was highly successful. He asked the Quebec Government to declare a beaver sanctuary in the Cabano area, but his request was refused.

Meantime his fame spread abroad. Visitors were astonished to notice that his daily activities were attended by his furred friends. Beaver would leave the water and follow Grey Owl into his cabin. They would eat from his hand; feed out of bottles. He helped them build dams and houses, his axe being quicker than their teeth. Once built, he guarded their dams, protected their young.

When he went abroad in his canoe he, invariably, was followed by his pets. The beaver learned how to climb into a canoe, and out again without upsetting the frail craft. And when Grey Owl went in swimming, the event became a great sports day with the beaver.

His fame reached the ears of Hon. T. G. Murphy, Manitoba's representa-

tive in the cabinet, who asked Grey Owl if he would move to Riding Mountain National Park and take charge of a beaver sanctuary. Grey Owl agreed. Never before had it been possible to keep beavers in captivity for any length of time. A young

Grey Owl rigged up his own transportation equipment, and succeeded in taking a pair of old beaver, his best friends, to Manitoba. They arrived safely and are now happy in the

rivers and lakes of the Riding Mountain Park. They will be protected from all harm and, as they multiply, the sanctuary will take on added interest to tourists. Within a few years it is expected that visitors to Riding Mountain will experience the thrill of having beaver come to them for food.

of petting them, of having beavers follow canoes and boats, and of bathing with beavers. When the Riding Mountain Park is thoroughly stocked with beaver, the surplus animals will be transferred to other western parks, such as the Prince Albert and Banff parks.

The Cost Of Sickness

Unnecessary Loss Of Life Each Year From Diseases That Could Be Prevented

(By John Burke Ingram.)

One Canadian out of every three dies ahead of his time, statistics show. One death out of every three deaths that bring sorrow to Canadian communities, large and small, could be postponed. We Canadians are letting our friends and relatives die because we do not know how many diseases there are which could be prevented or because knowing, we will not take the trouble, the simple trouble to prevent them. Why are these diseases not prevented?

That is the question which every thinking Canadian should want answered! For centuries disease was inevitable because mankind had not learned how to prevent it. Doctors existed to heal the sick, but it was nobody's business to attempt to prevent sickness from occurring because in those days it could not be done.

Then an English scientist, Edward Jenner, discovered vaccination against smallpox. Doctors began to vaccinate people—which meant that doctors began to treat "Healthy" people, in order to keep them from becoming ill by contracting smallpox. As a result this disease, at one time the greatest scourge of the race, has been beaten down till today it occupies a negligible place among the killers of civilized men.

The success of vaccination made medical scientists think along new lines. If a substance had been discovered which would prevent smallpox, why could not other substances be evolved to prevent other diseases?

The idea was sound. Today there is a substance which prevents diphtheria, another to prevent typhoid fever, another against scarlet fever, another to prevent lockjaw, another which used in infantile paralysis prevents crippling.

But though science is in a condition to prevent diseases by these and other means, we are not taking advantage of the protection which is offered to us. For centuries we regarded disease as a kind of god, and because it is to change the thinking habits of a people in one

single generation we will, even most of our leaders, retain this medieval attitude.

And therefore today, Canada's lifeblood is flowing from wounds inflicted upon her by her enemies—disease germs. Not merely in dollars and cents alone—disease kills us annually, but also in our nation's health. Canada needs population. Canada is constantly bringing foreign and other immigrants to our shore, yet the perils her own sons and daughters to die of diseases which could be, and should be, and some day shall be prevented! Diphtheria and typhoid fever, both preventable, take respectively 1,200 and 1,111 lives annually, yet both diseases are preventable! The death rate from tuberculosis has been cut in two in the past 25 years, and could be even with our present incomplete knowledge halved and halved again.

Cancer kills almost 8,000 Canadians every year, and despite the fact that we don't know what causes cancer, this death rate could be cut in half if adult Canadians would cultivate the habit of having themselves periodically and thoroughly examined by a competent physician every birthday. And so all through the pitiful list of diseases which now rob us of our best and fairest—heart disease, maternal mortality, infant mortality, venereal diseases, all can be cut down if men and women will realize that they get just exactly the kind of health service that they want and are willing to pay for, and that by backing their public health official, they may, in some measure, be held responsible for the health of a nation that is too indifferent to help itself.

Divorce By Legislation

The ninth application for divorce in the last 50 years was recently brought by the legislative council of the Isle of Man. As the island has no divorce law, a special bill must be passed for each case. After the council has passed the bill, it must be passed by the House of Keys, sent to London for royal assent and finally promulgated from the open-air Tynwald Court.

Predicts Stormy Summer

"Chatsworth Sage" Bases Conclusions On Purely Scientific Principles

Claiming to have forecast the weather for the past 14 months, including the extreme dry spell now prevailing on this continent, with almost perfect accuracy, J. B. Bowen, of Owen Sound, Ont., widely-known as the "Chatsworth Sage," has announced his prognostications for 1931. He has relinquished the copyrights on his forecasts for the benefit of his many followers all over the Dominion.

Mr. Bowen claims that his conclusions are based on purely scientific principles. His expenses are paid by himself. A check-up of his forecasts for the last 14 months reveals that he prophesied the present dry conditions throughout North America.

His forecast for the next eight months is as follows:
June—Very calm, cool and very dry for three weeks, last week strong winds and rains.

July—About ten days rest warm. About 12th to 25th, very strong persistent and cool winds, very heavy rains that will cause floods in many places, and in northern localities frost. This storm of winds will begin in January, will cause tremendous seas that will be very destructive to life and property.

August—First half very decidedly warm, sultry, with many thunderstorms. Latter half very warm and dry.

September—About the 6th very strong winds, very heavy rains and frosts. Last two-thirds of month very warm, calm and dry.

October—About first ten days mild and dry, about the 11th wind and rain, then mild; about the 18th strong, cold winds, rains, snow and frost; balance mild and calm.

November—Calm and cool and probably dry.

December—Very calm and very dry to about the 15th, then very strong winds, heavy rains and snowstorms.

January, 1932—Quite mild and calm for the first two-thirds of the month.

Tomatoes As A Diet

Will Be Chief Food For Members Of Whiffles Expedition

When Sir Hubert Wilkins sets forth in the Arctic submarine "Nautilus" on his expedition to the North Pole, the man in charge of meals for the entire personnel will be Harry Rothschild. When asked what will be the most important item in the under-the-ice menu, Mr. Rothschild is quoted in a news dispatch from Yonkers, N.Y., as responding: "Tomatoes." Mr. Rothschild is insistent in his contention that tomatoes—canned, in calup or in any other form—have an exceedingly invigorating effect upon people who are subjected to long confinement in stale air, as will be the case in this much-heralded under-the-sea expedition to the top of the world.

Mosquitoes never breed in swiftly flowing water.

Wicklow, Ireland. It trying to find means of housing its people.

Gift For King George

Presented With Valuable Addition To Stamp Collection

King George has accepted a valuable addition to his wonderful collection of postage stamps, an album which contains a complete set of the new pictorial postage stamps for the territory of Southwest Africa, together with a series of the issued stamps in unused, marginal blocks of four, for the royal collection. The presentation was made recently on behalf of the Union Government by the chief commissioner for South Africa, C. T. Water. These are the first stamps of definitive design to be circulated in the mandated territory, where up to now over-printed types of the Union itself have been employed. The subjects were obtained in open competition from South African artists, and from photographs, sketches and paintings selected by Colonel J. A. Verne, director of posts and telegraphs at Windhoek, while the actual engraving and printing has been carried out by Bradbury, Wilkinson and Company, Limited, at New Malden, Surrey, England.

Recipes For This Week

(By Betty Barclay)

CARROT PUDDING

This is a dessert well liked by those who visit Portugal. It is equally nice served with a pudding sauce or with cream.

- 1 1/2 cup butter.
- 1 cup brown sugar.
- 1 egg.
- 1 cup raw carrots, grated.
- 2 teaspoons lemon peel, grated.
- 1 cup flour.
- 1 teaspoon soda.
- 1 teaspoon baking powder.
- 1 teaspoon cinnamon.
- 1 teaspoon ginger.

Cream the butter. Add the sugar and slightly beaten egg. Stir in the carrots and grated lemon peel. Mix and sift the dry ingredients. Add in first mixture. Bake in a buttered pudding pan for one hour. Serve hot.

BEEF LOAF

- 1 1/2 pounds round of beef.
- 1 quart cold water.
- 1 tablespoon vinegar.
- 1 teaspoon sugar.
- 1 teaspoon salt and thyme, mixed.
- 1 tablespoon Worcestershire sauce.
- Salt and pepper.

Simmer the beef in the water with the salt until meat is tender. Cook. Remove bones and fat, and chop very fine. Boil the liquid until reduced to one cup. Add vinegar, sugar, salt, sugar, thyme, salt and pepper. Mix with the meat. Press into a buttered mold and leave to become thoroughly cold. Serve with tomatoes and lettuce with mayonnaise.

Icebergs contain no salt, because they are formed of glacier ice which was originally snow.

Itteracy is deplorable, but it is not as bad as being able to read everything and believing it all.

Canada and Newsprint Production

More Newsprint Made in Canada Than Any Other Country

More newsprint paper is made in Canada than in any other country. In 1930, Canada manufactured 2,504,000 tons, 30 per cent. of the world's production of newsprint paper. The tonnage was practically double that turned out in the United States, which was the nearest competitor to the Canadian mills, with an output of 18 per cent. of the world total. Great Britain and Germany each manufactured about nine per cent. and Newfoundland and Japan four per cent. each. These six countries accounted for about four-fifths of the world supply of newsprint which totalled 6,975,000 tons last year.

Though Canada's production totalled 30 per cent. of the aggregate for the upwards of 20 countries producing newsprint, her proportion of the export market was even larger.

Exhibition For Charity

England's fancy nice exhibition, at St. Albans, England, had more than 70 various kinds of plain and fancy mice shown by women fanciers. Mostly experimental, there are few limits to the combinations and cross breeds obtainable. Among the freak products are "white mice" with black eyes; silver and tan mice; black and tan mice, and one instance, extremely rare, a blue mouse. Proceeds from the exhibition are for charity.

By a new decree all tooth pastes must be analyzed, approved and registered by the government before they can be sold in Argentina.

CHAPTER XVII.—Continued

"I rather think we are! But you see, a family usually has a daddy and a mother, and more little children. Sunny and Nick, and their father and mother are a family, so you see, you couldn't have Mr. Hastings for your mother. Do you understand?"

"Not exactly. Who—who can I have? Could it be daddy?"

Halliday stifled an impulsive smile, and answered: "I'm afraid not; but—"

He seemed to hesitate; then said: "Martha, do you remember a lady who used to live here—a very pretty lady, in a blue gown?"

The child looked up, her eyes suddenly wide with distrust.

"She hurted my kitty. She hurted him so bad he runned away."

Halliday drew a deep breath. He had hoped the child had forgotten.

"She will never hurt your kitty again, dear. Would—would she possibly do for—a mother, little girl?"

"No," said Martha. She said old Halliday knew as if this, the strongest proposition had put something into her mind. "No," she said again, looking up soberly, "she isn't a mother. She won't be a mother."

Tears started behind Halliday's lids. It was all so pitifully true. Then, meeting his eyes, the child's innocent heart surmised that he was hurt, and she flung herself upon him, clasping his neck in a passion of overwhelming love.

"It doesn't matter—much," she comforted. "It doesn't matter hardly any. I've got you, Daddy."

"Yes," said Halliday huskily, and smiled. "There's not the least doubt in the world that you've got me!"

And next day he went to Boston to see his lawyer.

CHAPTER XVII.

It was on a day some five weeks later that Nick came back from a morning spent in the office of a native lawyer, and with a high relief dropped into a chair on the hotel veranda. The lawyer had proved slow, and plodding, and exact, to a degree that had made the way along New Englander land to take him by the collar and shake him up, and the day was hot.

Nick threw down his pannoas hat, and mopped his forehead, thankful for the fact that though the tropic sun in hot, the shade is cool, and after week ought to finish up the business. As he sat there looking out on the grove of palms that had become familiar in the past weeks, he felt torn between a desire to take the first boat home, and a longing to claim his vacation now, and see more of the island and its people.

Gal had urged him to stay as long as he could be spared; and only the day before had come a line from John Maxwell saying not to hurry back. "Take another month, boy, and see all there is to see while you've got it."

Gal had urged him to stay as long as he could be spared; and only the day before had come a line from John Maxwell saying not to hurry back. "Take another month, boy, and see all there is to see while you've got it."

Nick wondered, too. Although he had enjoyed almost every minute of the time, he had, all the way along, missed Gay's companionship. The night of a new beauty brought the wish that she were to share it

He wanted her comments on all he saw, his misadventures, his ending, his. For if a young marriage proves the right marriage, there is none so happy, perhaps because there is less adjusting to go through with. Youth understands its kind—has fewer habits to overcome—fewer prejudices.

Nick was hardly conscious of his surroundings that morning. He was thinking that in Bakersville it was spring. Gay's last letter had told of pussy willows, and venturesome robins. The snow was gone. There had been a tremendous thaw and the river road was flooded in low places. It had been exciting. The bridge at Lower Falls was threatened for a day; and Uncle Sam had hired Sam Hilton to take them in his car to "see the sights." The boys were tremendously excited, and began constantly to get into the bath tub and "play."

Nick felt a twinge of being regret that he had not been there to share in the excitement. "I believe I'm a good deal of a kid as Sunny," he mused.

"I'd have a swimming hole for foods, and circuses, and fairs. Freedom! I'll tell Mr. Maxwell it's not everything. I'd give it up! I'd give it up!"

He looked up, and began constantly to get into the bath tub and "play."

Nick felt a twinge of being regret that he had not been there to share in the excitement. "I believe I'm a good deal of a kid as Sunny," he mused.

"I'd have a swimming hole for foods, and circuses, and fairs. Freedom! I'll tell Mr. Maxwell it's not everything. I'd give it up! I'd give it up!"

He looked up, and began constantly to get into the bath tub and "play."

"So soon? Isn't it foolish not to see more now than you're here?"

It was foolish, Nick told himself that he had known it was foolish even when he made his resolve on her earlier.

"Perhaps," he answered. "But I ought to get back. This is a business trip on my part, you understand."

"But they'd let you stay, wouldn't they? In another month you could be back."

It was foolish, Nick told himself that he had known it was foolish even when he made his resolve on her earlier.

Mr. and Mrs. Alva Ellis were
visitors in town on Sunday.

Following a long sequence of
dry weather a welcome shower
of rain fell in town on Sunday.

Avon C.P.C. products, cold
creams, powder, etc., may be
obtained at the Barber Shop.

Ed. Preston, of Alaska, is tak-
ing the census north of the
river.

The Castle Coombe W.M.S.
will meet at the home of Mrs.
Harvey Ferguson, on June 10th
at 2 p.m. Everyone invited.

Charlie Young, who had been
visiting with his parents at T-
frenco, was waiting for Dr.
McNeill's car to be repaired,
arrived back on Thursday.

Dr. and Dr. Ruth Harvey,
Mr. and Mrs. Hall and Mrs.
Jones of Alaska, were visitors
to the picnic grounds on Thurs-
day last. Dr. Dowler was their
guest.

Mr. and Mrs. E. McGill and
Mrs. D. McEachern, left on a
visit to Calgary, the first of the
week, making the trip via As-
sank.

Mrs. Kelley reported seeing
a large grey hawk in town
on Tuesday morning, of the
type that favor the farther
north country.

World Problem—cont.

Russia, requires only 16 mil-
lions more than is produced. A
new crop is coming along with
more wheat already stored up
than will be required for the
whole year.

European countries all pro-
tected themselves by heavy im-
port duties against foreign
wheat and by milking quotas,
bounties, etc.

There is this over-production
of wheat just as there is this
over-production of newspaper

GRANT FLEMING, M.D., - ASSOCIATE SECRETARY

Diphtheria Can Be Prevented

We know as much about dip-
theria as we do about any other
disease, in fact we may know more.
We know the germ that
causes diphtheria; we know how
the disease is spread from one
person to another; we know how
to cure the disease; providing
treatment is given promptly
on the first day, and, lastly
and most important of all, we
know how to prevent diphtheria.

We are indeed in the happy
position of possessing the know-
ledge which would enable us to
overwhelm diphtheria and to
make it one of the rarest dis-
eases. We are in a position to
annihilate one of the foes which
for generations, has menaced
human life and left a trail of
damaged bodies in its wake.

To know this is one thing, but
to take the necessary action is
another. We know how to pre-
vent diphtheria, but just because
we have this knowledge, we
will not cause diphtheria to dis-
appear. Diphtheria will disap-
pear when we make use of
what we know and not before.

There is a substance called

potatoes, eggs, cotton, rubber,
oil, coffee, etc.

Modern machinery, scientific
farming and fertilizers have re-
sulted in this increased yield.
Fewer farm workers are re-
quired because with present
day methods, one worker pro-
duces about five times what he
formerly produced.

It is difficult to increase the
consumption of wheat. In fact
people are eating less, as the
average number of bushels
consumed year has decreased
from 6 to 5 per person. With
most manufactured goods the
case is different, as an almost
unlimited quantity could be
used if there were the buying
power to get these things.

A conference was held at
Rome recently and another con-
ference is being held in London
now on this wheat problem. An
Imperial conference may be
held in Ottawa this fall.

France will take 9 million
bushels about the usual amount,
but the hope of getting a mar-
ket in China is not promising.

The policy of increasing tar-
iffs which the Government is
following would seem to be a
move in the wrong direction.
Casting on the people to have
hope and courage and to reduce
production costs is quite futile.
Mr. Darling's suggestion to re-
store and fix the price of Silver
at 96 cents per ounce, instead of
leaving it at 26s, is worthy of
serious consideration. It seems
that we will not get a 100 per
cent Food or Marketing Board.
Grownies are full and stomachs
empty.

Sincerely, F. W. Gershaw,
M.P. for Medicine Hat.

CORRECTION

In our report in last week's
issue our notice of death should
have read, "Mrs. H. J. L. Lons-
on" and not "Mr." We ap-
ologize for this mistake which
was due to a mis-understanding.

should be given without delay.
It is urged upon all parents
not to delay in having all their
young children immunized.
When this has been done, we
can say not only that diphtheria
can be prevented, but also that
it has been prevented.

Idle Railway Land
Turned to Gardens

Chicago, May 26.—Railroad
yards beautified by blossoming
potato plants and cabbage pat-
ches will greet the eyes of trav-
ellers on the Milwaukee road
of the Chicago, Milwaukee, St.
Paul and Pacific Railroad Com-
pany this summer if a plan of
the railroad's committee for
relief among the unemployed
proves popular.

The railroad has just issued
instructions to supervisors
to give former employees and
part-time workers the free use
of the company property, not
needed for railroad purposes,
to be used for garden plots.
Considerable acreage adjacent
to the road's right-of-way and
in the railroad yards, it was
said, is made available by this
order.

Garden clubs are being for-
med under the auspices of the
Milwaukee Road Women's
Club at many places along the
system, it is said, and seeds are
furnished free by the club to
those unable to purchase them.

The following application
was taken from a Chinese news-
paper:

"Sir, I am Wang. I can drive
a typewriter with good noise
and my English is great. My
last job has left itself from me,
for the good reason that the
large man has died. It was on
account of my fault of mine.
So, honorable sir, what about
it? If I can be of big use to
you I shall arrive on same date
that you should guess."

Sporting Wear Specials
